

**Position:** Data Analysis Research Assistant – Centre for Policy Research

**Duration:** 1 year, renewable on an annual basis

**Key Responsibilities**

- Data analysis in the programming language R of a range of datasets, including on voting behaviour, government budgets and energy consumption patterns
- Help develop presentations and working papers that synthesize the analysed data and relate it to the academic and grey literature
- Be part of a niche and growing statistical analysis subgroup within CPR

**Qualifications and Skills Required**

- Proficient in the programming language R
- Strong quantitative and statistical skills with a completed/ongoing Master's degree (engineering, econometrics, public policy, other related fields) or an exceptional Undergraduate degree
- Proficient in MS Office (Word, Excel, PowerPoint)
- Ability to undertake thorough literature reviews
- Good writing skills

**Reporting**

- The candidate will work with and report to Ms. Avani Kapur, Dr. Radhika Khosla and Dr. Neelanjan Sircar

**Additional Requirements**

- The candidate must bring his or her own laptop

**Application Instructions**

- Please submit your CV and cover letter to [neelanjan.sircar@gmail.com](mailto:neelanjan.sircar@gmail.com)
- Please indicate your position of interest in the subject line
- Last date of submission, 6 December, 2017
