

## **Mapping Power: Electricity Governance in India's States**

### **Research Team**

#### ***Jonathan Balls***

Jonathan is a DPhil student within the School of Geography and the Environment. His current interests focus on state, society and market relations in contemporary India, development and environmental sustainability. His DPhil work explores this focus through a case study of the developing off-grid solar power sector in North India. He holds a BA degree in Geography from the University of Cambridge; and an MSc in Nature Society and Environmental Policy (with Distinction), from the University of Oxford.

#### ***Dr Elizabeth Chatterjee***

Elizabeth researches and teaches aspects of environmental politics, energy policy, and Indian political economy—amongst other things. Since October 2015, she has been a Postdoctoral scholar at the University of Chicago, where she is working on a project titled ‘Studies in Climate Change: The Limits of the Numerical’. In particular, she looks at the politics of target setting and climate change mitigation policy. She has a DPhil in International Development and MSc in Contemporary India, both from the University of Oxford. She has an undergraduate degree in History (Hons), also from the University of Oxford.
