

Position: Research Associate (Data), Scaling City Institutions for India: (SCI-FI)

The Centre for Policy Research (CPR) has been one of India's leading public policy think tanks since 1973. The Centre is a non-profit, independent institution dedicated to conducting research that contributes to a more robust public discourse about the structures and processes that shape life in India.

CPR's community of distinguished academics and practitioners represents views from many disciplines and across the political spectrum. Senior faculty collaborate with more than 50 young professionals and academics at CPR and with partners around the globe to investigate topics critical to India's future. CPR engages around five broad themes: economic policy; environmental law and governance; international relations and security; law, regulation, and the state; and urbanization.

The SCI-FI programme at CPR is a multi-disciplinary research, outreach and policy support initiative. It has two key thematic focuses in areas of Land, Housing and Planning, and Water and Sanitation. The SCI-FI initiative has been nested at CPR since 2013.

It seeks to understand the reasons for poor urban planning and WASH, and to examine how these might be related to technology, service delivery, institutions, governance, finance, and socio-economic dimensions. It also seeks to support national, state and city authorities in developing policies and programmes for intervention with the goal of improving governance in urban areas.

Description of responsibilities

This position will involve working with primary and secondary data to develop insights and policy recommendations for improving urban planning and WASH related services. The responsibilities associated with this role are:

- Support the team in research by
 - Undertaking primary and secondary data analysis for developing relevant policy insights on issues of urban land, planning, housing and WASH
